Changes to the statement

The historic area statement only applies to properties or development located within the historic area overlay. The purpose of the statement is to identify the attributes specific to the historic area and to ensure that development proposals are consistent with the characteristics expressed therein.

The code amendment proposes to change the wording of the area statement to better reflect the eras, patterns and characteristics of development. These updates are shown below in yellow

Eras, themes and context	1860s to 1920s
Allotments, subdivision and built form patterns	Strong uniformity of allotment pattern. Low to very low density site areas. Wide frontages. Detached and semi-detached to allotments.
Architectural styles, detailing and built form features	Predominantly detached Victorian villas with some examples of Victorian semi-detached dwellings and Victorian single fronted cottages; bungalows; inter-war art deco dwellings; and parapeted shopfronts. Key architectural features include: bay windows, gable and Dutch gable roofs, steeply pitched hip roofs. Integrated and complementary verandahs/porticos. Other notable built form features include consistent scale and massing, and a regular pattern of fenestration (proportion of openings) and historic colour palettes. Additions, including carports and garages, are generally located to the side and/or rear of the dwelling.
Building height	Generally single storey. Single storey within the roof space.
Materials	Stone. Brick. Limited rendered masonry. Corrugated pre-coloured or galvanised iron sheeting. Timber windows. Leadlight windows. Iron and timber filigree. Red brick chimneys.
Fencing	Low front fencing facilitating view of the dwelling comprising post and rail with woven wire, low level stone or masonry or timber picket.
Setting, landscaping, streetscape and public realm features	Strong uniformity of layout and buildings. Generous side and rear setbanks, maintaining large private yards. Carports and garages are behind the main face of dwellings. Traditional well-maintained gardens. Tree lined streets. Vehicle access has been designed and located to preserve existing street trees. Vehicle access is via rear lanes where available.
Representative buildings	Identified - refer to SA planning database.
